Act Report
We Rate Dogs Project

Sarah El-Khouly

December 2020

1. Introduction

First, WeRateDogs is a Twitter account that rates people's dogs with a humorous comment about the dog.

These ratings almost always have a denominator of 10. The numerators however are almost always greater than 10 (11/10, 12/10, 13/10, etc.). In theory the rates should be 1 to 10. However, WeRateDogs disagree, they admit almost all dogs deserve a 10 and sometimes more than that.
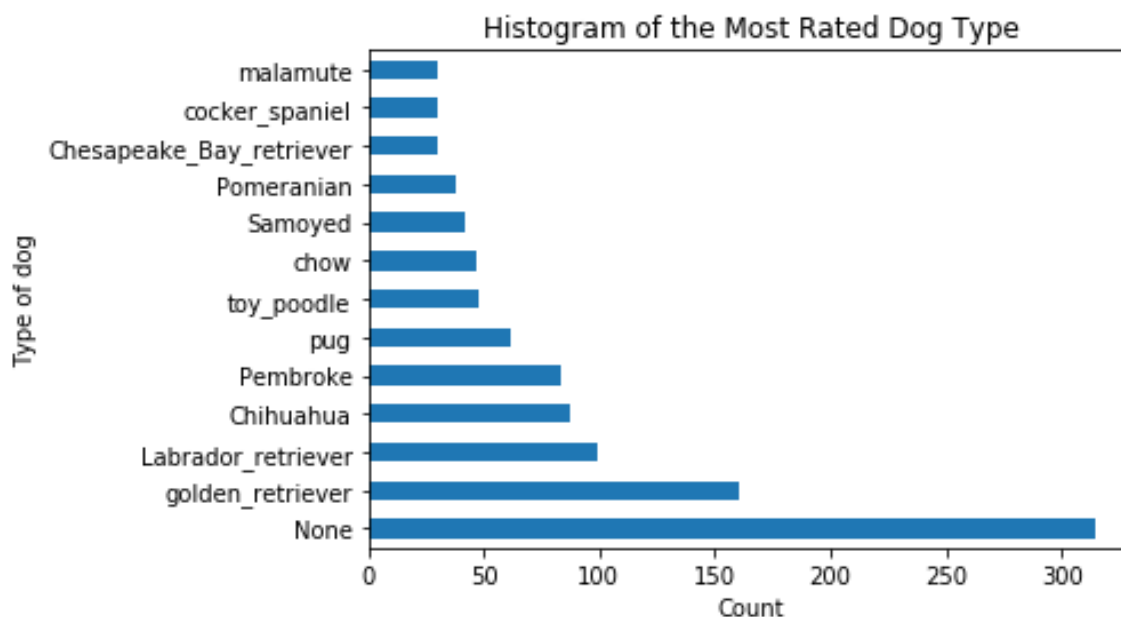

So what does this rating do? Which dog type (breed) is most common dog in the tweet dataset? What dog type has the highest average rating? These questions and more are answered in the following insights:

2. Insights and Visualization

Communicate the insights and displays the visualization(s) produced from the wrangled data.

2.1. Most common dog breed

WeRateDogs has over 6000+ tweets. I was able to analyzed around 1500+ tweets. The most rated dog was golden retriever with more than 300 ratings. The second most popular breed is Labrador retriever and Chihuahua isn't far behind.

2.2. Retweets Observations

Amazingly the highest ratings do not receive the most retweets. Many tweets have been retweeted more than 1000 times some more than even 50000 times. There is not a clear relationship between the ratings and the retweets.

Retweet Counts by Ratings Scatter Plot

2.3. Lowest average rating among dog types

Almost all dogs deserve ratings above 10. This is a notable exception. This Clumber has the lowest average rating.

This is an example of the most rated dog type (Blenheim_spaniel).

2.4.   Common names

Names are important, especially for dogs. Surprisingly the most three common names are:

- Charlie.

- Lucy.

- Cooper.
